acts-as-taggable (gem)
September 2014
Contributed a feature that allows users to display a chosen number (default 50) of most/ least used tags.

Diaspora*
August - September 2014
• Contributed to installation instructions for Mac OS X 10.8 or higher.
• Contributed feature that allows users to auto add a poll answer when creating a poll.
• Contributed feature that displays services (Facebook, Twitter, etc.) in statistics.json.
• Implemented line breaks in headings that were too long to display.
• Created feature to display 50 most used tags in statistics.json but the feature was not merged due to disagreements on whether to have it or not by the larger Diaspora* community.
